**Disclaimer:** Most damage records are related to accidents, but that's not always the case. Some records come from other sources like body shops, damage claims, auctions, or vehicle inspections. These records show that the vehicle's condition was assessed, even if it wasn't due to an accident.

**Damage Glossary**

**Assessment**  
Assessment is the process of evaluating the extent of damage to a vehicle. It involves inspecting the vehicle to determine what repairs are needed, estimating the costs, and deciding whether the vehicle is repairable or considered a total loss.

**Estimated Repair Cost**  
Once an incident related to a vehicle is assessed, damage data providers calculate the repair cost and present it in the currency of the country where the damage was evaluated. Therefore, this may not align with your expectations. The reasons for this may include:

- The country or state where damage to the vehicle was assessed may have higher/lower servicing costs compared to your country (spare part prices and labor prices differ between countries)
- The cost is calculated for repairs at an official service station (which is typically on the expensive end)

## Natural disasters

Has the vehicle's location been recorded in the area of a natural disaster?
